🎓 EDUCATION

Computer Science

Lebanese university

2021 – 2024 | Beirut, Lebanon

📁 PROJECTS

Space website [🔗](#)

2021 – 2022

Developed and implemented a comprehensive computer science project involving the creation of a website dedicated to exploring the captivating subjects of space plants and black holes, utilizing HTML, JavaScript, and CSS technologies.

Study for a dorm website

2022 – 2023

Spearheaded an in-depth software engineering study for a dorm management system, undertaking a thorough examination of every aspect of the project. Employed mockups to visualize and plan the system's design, ensuring a comprehensive and well-rounded approach to its development.

Iphone store site [🔗](#)

2022 – 2023

Designed and developed a dynamic website showcasing an iPhone store, leveraging HTML, JavaScript, and CSS technologies.

Monster Friends [🔗](#)

2023 – 2023

Designed and implemented a web application utilizing React, initially employing class components and later optimizing functionality by transitioning to functional components. This application focused on efficiently managing and searching through a catalog of monster cards.
