A passionate fast learner with a background in data science and machine learning and a desire to enhance my skills and dive into artificial intelligence. I'm currently completing my bachelor degree in **Electrical & Computer Engineering**. I'm seeking a master opportunity in the domain of data science and AI to develop my experience further and acquire new skills.

Education

LEBANESE UNIVERSITY – LUFE

2018-2023

Electrical and Electronics Engineer (in progress)

Beirut, Lebanon

MASSACHUSETTS INSTITUTE OF TECHNOLOGY – MIT

2020-2021

Participant in ReACT-MIT Computer & Data Science Program

Certificates

- Analyzing Data with Python online course. 2021
- Participated in MIT Innovation and Leadership Bootcamp. 2020
- Machine Learning online course (Stanford University). 2020
- Machine Learning online course for business professionals. 2020
- Machine Learning online course in managing projects with Google Cloud. 2020
- Statistics, Calculus, Probability courses. 2019-2020

Personal Attributes

- Solid knowledge of object-oriented concepts and expertise in C, C++, Python programming languages.
- Mother Tongue: Arabic, Fluent in English.
- Proactive and self-motivated, ability to understand and solve complex problems. Willing to be flexible and accept new challenges.
- Confident, Patient and Adaptive with different environments.

Activities & Interests

- Member of Cyber community at the University- where I enhance my techniques in data security and protection by completing a series of challenges with like-minded individuals.
- Attended an Arduino 4-weeks workshop covering all the basics with a final project.
- Chief at a local Scout group (Lycee National – Choueifat) where I lead a group of students by completing team building activities and community projects. This has developed my leadership, communication and adaption skills.
- Completing charity work and local volunteering, assisting with various movements. This has developed my teamwork and communication skills.
