Microsoft Office   Canva

MY OPEN-SOURCE PROJECTS

Text Utils
I develop a text utilities project enabling users to manipulate text by converting it to upper or lower case, clearing the text area, or downloading the text.

Flag Quiz Game
I created a flag quiz game where users identify country flags. The game tracks total clicks and calculates the percentage of correct answers, highlighting my expertise in development and user engagement.

Open API
I utilized an open API to showcase dynamic content including posts, comments, photo albums, to-dos, and user data.

Flex Wheel
I develop a car rental booking platform with a reservation email form, enabling users to enter their name, email, and description before sending a booking request.

INoteBook
iNotebook is a user-friendly application that allows users to manage their notes efficiently. Users can login, signup, and perform CRUD (Create, Read, Update, Delete) operations on their notes, ensuring they can organize their information effectively.
